## PERSONAL STATEMENT

Your personal statement should be about 4-5 lines talking about what you do, where you have come from and where you are going. This is where you can inject a little personality and talk about the traits that make you amazing.

This is a part of the resume that will change over time, so make sure you keep this updated.

## WORK EXPERIENCE

Jan 16 – present Company you worked for and title you held

Lead a small team of 5 engineers to design develop and deploy an android application against tight deadlines, I was a lead technical contributor and worked with a product owner to keep stakeholders up to date with progress.

## INTERESTS

This is about creating some rapport with your interviewer, they make your CV memorable and help you to stand out a bit. This should be a few lines at the max, we are simply looking for something to peak interest and at this stage we just want the client to be interested enough to meet you.
